

SAB Coatings
for Chemicals and Paints

SAB Coatings
for Chemicals and Paints

About us:

Our journey of success began in 2010

When our founders Sabbagh family established the first factory in Aleppo, Syria.

In 2021, we took the decision to move our business in Egypt, a more established, firmer, and focused expansion. We implemented the first milestone and that's to enter the African continent through the Egyptian market.

Today SAB Coatings consider one of the best paints manufacturers in Egypt with high quality paints that offer full solutions to all market segments; we export to 6 countries and employ over 50 qualified professionals.

Our mission:

SAB Coatings is an established full solution paint provider. We are guardians of our customers most valuable assets.

We strive to maintain this through continuous hard work to clearly understand our clients needs, and constantly improve our performance.

We are a team of highly qualified professionals, whose constant training and development are paramount to our existence. We implement effective business processes that deliver results.

We treat people fairly, with respect and dignity. We reward contribution and achievement and strictly committed to our values of social responsibility, integrity and safety.

We promise to deliver consistent trusted paint solutions.

Our vision:

Leading the paint industry in Africa and Middle East region by becoming the supplier of choice to all customers.

Our values:

Our values constitute our ethical code of conduct in doing business. They guide us in all our actions and remain intact in all our markets.

Head Office & Factory
Plot No. 58 - Area 13
